Re: Waterworks District No. 1
Non-Lead Statement

In accordance with the Environmental Protection Agency's (EPA) mandated Lead and Copper Rule Revisions (LCRR) requirements, Waterworks District No. 1 (WWD#1) was required to investigate all service lines in the water district to determine if the material was lead, galvanized requiring replacement (GRR), non-lead, or unknown on both the public and private side of the water meter. WWD#1 has determined that there are **no** lead, GRR, or unknown service lines in the water system. This determination was based on a review of construction records, meter installation records, and the water district's standard operating procedures and requirements.
